Creative approaches for building formulas within formulas, pivot tables, conditional formatting, and mastering array formulas are just some of the numerous challenges explained. This is the all-encompassing resource for advanced users of Excel wanting to learn more techniques to broaden and empower their use of Excel.

Advanced Secure Optical Image Processing for Communications Ayman Al Falou,2018 New image-processing tools and data-processing network systems have considerably increased the volume of transmitted information such as 2D and 3D images with high resolution. Thus, more complex networks and long processing times become necessary, and high image quality and transmission speeds are requested for an increasing number of applications. To satisfy these two requests, several, either numerical or optical solutions, were offered separately. Advanced Secure Optical Image Processing for Communications explores both alternatives and describes research works that are converging towards optical/numerical hybrid solutions for high-volume signal and image processing and transmission. Without being limited to hybrid approaches, the latter are particularly investigated in this book in the purpose of combining the advantages of both techniques. Additionally, pure numerical or optical solutions are also considered since they emphasize the advantages of one of the two approaches separately.

The Geometry Of The Universe Colin Rourke,2021-06-03 Cosmology, the study of the universe, arouses a great deal of public interest, with serious articles both in the scientific press and in major newspapers, with many of the theories and concepts (e.g. the 'big bang' and 'black holes') discussed, often in great depth. Accordingly the book is divided into three parts: Part 1 is readable (and understandable) by anyone with a nodding acquaintance with the basic language of cosmology: events, lights paths, galaxies, black holes and so on. It covers the whole story of the book in a way as untechnical as possible given the scope of the topics covered. Part 2 covers the same ground again but with enough technical details to satisfy a

reader with basic knowledge of mathematics and/or physics. Part 3 consists of appendices which are referred to in the other parts and which also contain the highly technical material omitted from Section 2.

Pattern Discrimination Clemens Apprich, Wendy Hui Kyong Chun, Florian Cramer, Hito Steyerl, 2018-11-13 How do “human” prejudices reemerge in algorithmic cultures allegedly devised to be blind to them? How do “human” prejudices reemerge in algorithmic cultures allegedly devised to be blind to them? To answer this question, this book investigates a fundamental axiom in computer science: pattern discrimination. By imposing identity on input data, in order to filter—that is, to discriminate—signals from noise, patterns become a highly political issue. Algorithmic identity politics reinstate old forms of social segregation, such as class, race, and gender, through defaults and paradigmatic assumptions about the homophilic nature of connection. Instead of providing a more “objective” basis of decision making, machine-learning algorithms deepen bias and further inscribe inequality into media. Yet pattern discrimination is an essential part of human—and nonhuman—cognition. Bringing together media thinkers and artists from the United States and Germany, this volume asks the urgent questions: How can we discriminate without being discriminatory? How can we filter information out of data without reinserting racist, sexist, and classist beliefs? How can we queer homophilic tendencies within digital cultures?

Building Urban Landscapes Aaron Betsky, Andrew Bromberg, 2018-11-27 A major monograph of American architect Andrew Bromberg that explores how landscapes, both natural and human, inspire his designs The work of Andrew Bromberg, creative director of the global architecture and design practice Aedas and a leading light in cutting-edge design of skyscrapers and large-scale developments, has appeared across Asia and the Arab peninsula. Born in the United States but

now inhabiting the craggy mixture of natural and human-made rocks that defines Hong Kong, Bromberg considers cities not just as collections of buildings but as human-made landscapes shaped by social and economic forces equivalent to the erosions, accretions, uplifts, and explosions that shape the natural world. Through a series of chapters that explore the exceptional urban sites of Bromberg's buildings, architecture critic Aaron Betsky reveals how Bromberg visualizes his settings and relates his designs to the dynamic contexts in which they appear. Bromberg shows through his drawings and photographs what nature has meant, and still means, to him, observations that help readers understand the concept of urban development in relation to its natural origins.

Failed Images Ernst van Alphen, 2018 'Failed Images' attempts to understand the divergence between photography and the reality it portrays, analysing the various ways the photograph transforms that which exists before the camera. Because the photographic medium enables very different practices, which in turn results in many kinds of images, it must also be examined from a perspective outside of the dominant approach to the medium, generally called the 'snapshot.' This book therefore explores the photographic image by focusing on practices which refuse this conventional approach, namely staged, blurred, under- and overexposed, and archival photography.

A new paradigm for the universe Colin Rourke,2017-10-23 This book provides a completely new approach to understanding the universe. The main idea is that the principal objects in the universe form a spectrum unified by the presence of a massive or hypermassive black hole. These objects are variously called quasars, active galaxies and spiral galaxies. The key to understanding their dynamics is angular momentum and the key tool, and main innovative idea of this work, is a proper formulation of Mach's principle using Sciama's ideas. The new approach provides an explanation for the observed dynamics of spiral galaxies without needing so called dark matter and gives a framework that fits the observations of Arp and others that show that quasars typically exhibit intrinsic redshift. These fantastic observations have no place in current mainstream cosmology and, to the lasting shame and discredit of the cosmological community, Arp himself was hounded out and denied observation time on the big telescopes.

Belonging Nora Krug,2019-09-17 * Winner of the National Book Critics Circle Award * Silver Medal Society of Illustrators ** Named a Best Book of the Year by The New York Times, The Boston Globe, San Francisco Chronicle, NPR, Comics Beat, The Milwaukee Journal-Sentinel, Kirkus Reviews, and Library Journal This "ingenious reckoning with the past" (The New York Times), by award-winning artist Nora Krug investigates the hidden truths of her family's wartime history in Nazi Germany. Nora Krug was born decades after the fall of the Nazi regime, but the Second World War cast a long shadow over her childhood and youth in the city of Karlsruhe, Germany. Yet she knew little about her own family's involvement; though all four grandparents lived through the war, they never spoke of it. After twelve years in the US, Krug realizes that living abroad has only intensified her need to ask the questions she didn't dare to as a child. Returning to Germany, she visits archives, conducts research, and interviews family members, uncovering in the process the stories of her maternal grandfather, a

driving teacher in Karlsruhe during the war, and her father's brother Franz-Karl, who died as a teenage SS soldier. In this extraordinary quest, "Krug erases the boundaries between comics, scrapbooking, and collage as she endeavors to make sense of 20th-century history, the Holocaust, her German heritage, and her family's place in it all" (The Boston Globe). A highly inventive, "thoughtful, engrossing" (Minneapolis Star-Tribune) graphic memoir, *Belonging* "packs the power of Alison Bechdel's *Fun Home* and David Small's *Stitches*" (NPR.org).
