*Visual Voyages* Daniela Bleichmar, 2017-01-01 An unprecedented visual exploration of the intertwined histories of art and science, of the old world and the new From the voyages of Christopher Columbus to those of Alexander von Humboldt and Charles Darwin, the depiction of the natural world played a central role in shaping how people on both sides of the Atlantic understood and imaged the region we now know as Latin America. Nature provided incentives for exploration, commodities for trade, specimens for scientific investigation, and manifestations of divine forces. It also yielded a rich trove of representations, created both by natives to the region and visitors, which are the subject of this lushly illustrated book. Author Daniela Bleichmar shows that these images were not only works of art but also instruments for the production of knowledge, with scientific, social, and political repercussions. Early depictions of Latin American nature introduced European audiences to native medicines and religious practices. By the 17th century, revelatory accounts of tobacco, chocolate, and cochineal reshaped science, trade, and empire around the globe. In the 18th and 19th centuries, collections and scientific expeditions produced both patriotic and imperial visions of Latin America. Through an interdisciplinary examination of more than 150 maps, illustrated manuscripts, still lifes, and landscape paintings spanning four hundred years, *Visual Voyages* establishes Latin America as a critical site for scientific and artistic exploration, affirming that region's transformation and the transformation of Europe as vitally connected histories.

**Colonial Botany** Londa Schiebinger, Claudia Swan, 2016-03-01 In the early modern world, botany was big science and big business, critical to Europe's national and trade ambitions. Tracing the dynamic relationships among plants, peoples, states, and economies over the course of three centuries, this collection of essays offers a lively challenge to a historiography that has emphasized the rise of modern botany as a story of taxonomies and pure systems of classification. Charting a new

map of botany along colonial coordinates, reaching from Europe to the New World, India, Asia, and other points on the globe, Colonial Botany explores how the study, naming, cultivation, and marketing of rare and beautiful plants resulted from and shaped European voyages, conquests, global trade, and scientific exploration. From the earliest voyages of discovery, naturalists sought profitable plants for king and country, personal and corporate gain. Costly spices and valuable medicinal plants such as nutmeg, tobacco, sugar, Peruvian bark, peppers, cloves, cinnamon, and tea ranked prominently among the motivations for European voyages of discovery. At the same time, colonial profits depended largely on natural historical exploration and the precise identification and effective cultivation of profitable plants. This volume breaks new ground by treating the development of the science of botany in its colonial context and situating the early modern exploration of the plant world at the volatile nexus of science, commerce, and state politics. Written by scholars as international as their subjects, Colonial Botany uncovers an emerging cultural history of plants and botanical practices in Europe and its possessions.

**Rhapsody in Green: A Writer, an Obsession, a Laughably Small Excuse for a Vegetable Garden** Charlotte Mendelson,2018-07-16 'Charming, inspiring, uplifting ... pure lovely,' - Marian Keyes 'Read Rhapsody in Green. A novelist's beautiful, useful essays about her tiny garden.' - India Knight 'Glorious...for anyone who loves fruit, vegetables, herbs and language. It makes you see them with new eyes.' - Diana Henry 'A witty account of 'extreme allotmenting' for all obsessive

gardeners' - Mail on Sunday 'An extremely entertaining and inspiring story of one woman's passionate transformation of a small, irregular shaped urban garden into a bountiful source of food.' - Woman & Home 'A gardening book like no other, this is the author's 'love letter' to her garden. She relays warm and witty stories about the trials and tribulations throughout her gardening year.' - Garden News '...this inspirational, funny book, written by someone who hankers after a homesteader's lifestyle, will make you look at even your window box in a new, more productive light.' - The Simple Things Gardening can be viewed as a largely pointless hobby, but the evangelical zeal and camaraderie it generates is unique. Charlotte Mendelson is perhaps unusually passionate about it. For despite her superficially normal existence, despite the fact that she has only six square metres of grotty urban soil and a few pots, she has a secret life. She is an extreme gardener, an obsessive, an addict. And like all addicts, she wants to spread the joy. Her garden may look like a nasty drunk old man's mini-allotment, chaotic, virtually flowerless, with weird recycling and nowhere to sit. When honoured friends are shown it, they tend to laugh. However, it is actually a tiny jungle, a minuscule farm, a wildly uneconomical experiment in intensive edible cultivation, on which she grows a taste of perhaps a hundred kinds of delicious fruits and odd vegetables. It is a source of infinite happiness and deep peace. It looks completely bonkers. Arguably, it's the most expensive, time-consuming, undecorative and self-indulgent way to grow a salad ever invented, but when tired or sad or cross it never fails to delight.
