In the Shadow of Yalta Piotr Piotrowski, 2011 *In the Shadow of Yalta* is a comprehensive study of the artistic culture of the region between the Iron Curtain and the USSR, taking in Bulgaria, Czechoslovakia, Germany, Hungary, Poland, Romania and Yugoslavia. Piotr Piotrowski chronicles the relationship between art production and politics in this zone between the end of World War II and the fall of Communism, focusing in particular on the avant-garde.

3D Printing with MatterControl Joan Horvath, Rich Cameron, 2015-09-14 In *3D Printing With MatterControl*, Joan Horvath and Rich Cameron, the team behind *Mastering 3D Printing*, explain step-by-step how to use the MatterControl program, which allows you to control many common types of 3D printers (including both cartesian and delta style machines). *3D Printing With MatterControl* can stand alone, or it can be a companion to *Mastering 3D Printing* to show you how to install, configure, and use best practices with your printer and printing software. The book includes both step by step software walkthroughs and case studies with typical 3D printed objects. Whether you are a maker or a teacher of makers, *3D Printing with MatterControl* will show you how to get the most out of your printer with the new standard for open source 3D printing software. While there are books available on 3D printers, and even a few on software to make models for printers, there are few good sources covering the software that actually controls these printers. MatterControl is emerging as the leading open source software for 3D printers, and *3D Printing With MatterControl* covers this new standard in this brief book.

3D Printing of Pharmaceuticals Abdul W. Basit, Simon Gaisford, 2018-08-06 3D printing is forecast to revolutionise the pharmaceutical sector, changing the face of medicine development, manufacture and use. Potential applications range from pre-clinical drug development and dosage form design through to the fabrication of functionalised implants and regenerative medicine. Within clinical pharmacy practice, printing technologies may finally lead to the concept of personalised medicines becoming a reality. This volume aims to be the definitive resource for anyone thinking of developing or using 3D printing technologies in the pharmaceutical sector, with a strong focus on the translation of printing technologies to a clinical setting. This text brings together leading experts to provide extensive information on an array of 3D printing techniques, reviewing the current printing technologies in the pharmaceutical manufacturing supply chain, in particular, highlighting the state-of-the-art applications in medicine and discussing modern drug product manufacture from a regulatory perspective. This book is a highly valuable resource for a range of demographics, including academic researchers and the pharmaceutical industry,

providing a comprehensive inventory detailing the current and future applications of 3D printing in pharmaceuticals. Abdul W. Basit is Professor of Pharmaceutics at the UCL School of Pharmacy, University College London. Abdul's research sits at the interface between pharmaceutical science and gastroenterology, forging links between basic science and clinical outcomes. He leads a large and multidisciplinary research group, and the goal of his work is to further the understanding of gastrointestinal physiology by fundamental research. So far, this knowledge has been translated into the design of new technologies and improved disease treatments, many of which are currently in late-stage clinical trials. He has published over 350 papers, book chapters and abstracts and delivered more than 250 invited research presentations. Abdul is also a serial entrepreneur and has filed 25 patents and founded 3 pharmaceutical companies (Kuecept, Intract Pharma, FabRx). Abdul is a frequent speaker at international conferences, serves as a consultant to many pharmaceutical companies and is on the advisory boards of scientific journals, healthcare organisations and charitable bodies. He is the European Editor of the International Journal of Pharmaceutics. Abdul was the recipient of the Young Investigator Award in Pharmaceutics and Pharmaceutical Technology from the American Association of Pharmaceutical Scientists (AAPS) and is the only non-North American scientist to receive this award. He was also the recipient of the Academy of Pharmaceutical Sciences (APS) award. Simon Gaisford holds a Chair in Pharmaceutics and is Head of the Department of Pharmaceutics at the UCL School of Pharmacy, University College London. He has published 110 papers, 8 book chapters and 4 authored books. His research is focused on novel technologies for manufacturing medicines, particularly using ink-jet printing and 3D printing, and he is an expert in the physico-chemical characterisation of compounds and formulations with thermal methods and calorimetry.

Art and Democracy in Post-Communist Europe Piotr Piotrowski,2012-08-01 When the Iron Curtain fell in 1989, Eastern Europe saw a new era begin, and the widespread changes that followed extended into the world of art. Art and Democracy in Post-Communist Europe examines the art created in light of the profound political, social, economic, and cultural transformations that occurred in the former Eastern Bloc after the Cold War ended. Assessing the function of art in post-communist Europe, Piotr Piotrowski describes the changing nature of art as it went from being molded by the cultural imperatives of the communist state and a tool of political propaganda to autonomous work protesting against the ruling powers. Piotrowski discusses communist memory, the critique of nationalism, issues of gender, and the representation of historic trauma in contemporary museology, particularly in the recent founding of contemporary art museums in Bucharest,

Tallinn, and Warsaw. He reveals the anarchistic motifs that had a rich tradition in Eastern European art and the recent emergence of a utopian vision and provides close readings of many artists—including Ilya Kavakov and Krzysztof Wodiczko—as well as Marina Abramovic’s work that responded to the atrocities of the Balkans. A cogent investigation of the artistic reorientation of Eastern Europe, this book fills a major gap in contemporary artistic and political discourse.

Court, Cloister, and City Thomas DaCosta Kaufmann,1995 In this book, Thomas DaCosta Kaufmann chronicles more than three hundred years of painting, sculpture, and architecture in Germany, Poland, the Czech Republic, Slovakia, Hungary, Austria, Ukraine, Lithuania and western parts of the Russian Federation. Massive in scale, the book is highly accessible and lavishly illustrated. The readability of the text and the entirely new insights it provides into three hundred years of Central European history make this a vital introduction to one of the least understood periods in the history of art.

3D Printing in Medicine Frank J. Rybicki,Gerald T. Grant,2017-09-27 This book describes the fundamentals of three-dimensional (3D) printing, addresses the practical aspects of establishing a 3D printing service in a medical facility, and explains the enormous potential value of rendering images as 3D printed models capable of providing tactile feedback and tangible information on both anatomic and pathologic states. Individual chapters also focus on selected areas of applications for 3D printing, including musculoskeletal, craniomaxillofacial, cardiovascular, and neurosurgery applications. Challenges and opportunities related to training, materials and equipment, and guidelines are addressed, and the overall costs of a 3D printing lab and the balancing of these costs against clinical benefits are discussed. Radiologists, surgeons, and other physicians will find this book to be a rich source of information on the practicalities and expanding medical applications of 3D printing.

Christmas Cookie Murder Leslie Meier,2008-10-01 New York Times-Bestselling Author: “A down-to-earth sleuth” investigates carnage at a cookie exchange (Library Journal). For Lucy Stone, the best thing about Christmas in Tinker’s Cove, Maine, has always been the annual Cookie Exchange. But the usual generosity and goodwill is missing from this year’s event, which turns out to be a complete disaster. Petty rivalries and feuds that have long been simmering finally come to a boil, leaving a bad taste in the mouths of many guests, including Lee Cummings—who accuses Tucker Whitney of stealing her recipe for low-fat, sugar-free cookies. But the icing on the cake is when Tucker is found strangled in her apartment the following morning. Who could’ve wanted Tucker dead badly enough to kill her? Despite all of the ingredients for danger, Lucy sets out on the trail of a murderer and soon uncovers a Christmas secret best left wrapped. “Reading a new Leslie Meier mystery is like catching up with a dear old friend.”—Kate Carlisle, New York Times bestselling author

Modern Art in Eastern Europe S. A. Mansbach,1998-09-28 This pioneering and award-winning study provides the world with the first coherent narrative of Eastern European contributions to the modern art movement. Analyzing an enormous range of works, from art centers such as Prague, Warsaw and Budapest, (many published here for the first time), S.A.

Mansbach shows that any understanding of Modernism is essentially incomplete without the full consideration of vital Eastern European creative output. He argues that Cubism, Expressionism and Constructivism, along with other great modernist styles, were merged with deeply rooted, Eastern European visual traditions. The art that emerged was vital modernist art that expressed the most pressing concerns of the day, political as well as aesthetic. Mansbach examines the critical reaction of the contemporary artistic culture and political state. A major groundbreaking interpretation of Modernism, *Modern Art in Eastern Europe* completes any full assessment of twentieth-century art, as well as its history. *Modern Art in Eastern Europe* is the recipient of the 1997 C.I.N.O.A. Prize, awarded by La Confédération Internationale de Négociants en Oeuvres d'Art. The prize is awarded to defray the costs of publication in order to encourage publishers to produce manuscripts of particular merit and the works of younger art historians.
