**The Company of Adventurers** Isaac Cowie, 1993-01-01 The Hudson's Bay Company had been operating for nearly two centuries when young Isaac Cowie joined it in 1867. He sailed from the Shetland Islands to Rupert's Land, finally reaching York Factory, where he awaited his assignment. Company of Adventurers describes the early, lusty history of the HBC and the years of Cowie's service, when manufactured goods were driving out the demand for furs and buffalo hides. It contains rare information about the Assiniboin and Plains Crees Indians during the period before their confinement to reservations. Alive to the historical and ethnographic value of his writing, Cowie tells about his tenure as a clerk (later manager) at Fort Qu'Appelle in southern Saskatchewan, the colorful personalities who served with him, the wide-ranging fur brigades, remote outposts, and the Company's relations with Indian tribes. He was the first white man known to have set foot within the Swift Current District when in 1868 he hunted buffalo there. His dealings with the M tis during the Red River Rebellion placed him where history was being made. In an introduction to this Bison Book edition, David Reed Miller discusses how Cowie fitted into a great commercial enterprise and how he became a victim of unpleasant circumstances that forced his retirement in 1891.

**3D Printing with MatterControl** Joan Horvath, Rich Cameron, 2015-09-14 In 3D Printing With MatterControl, Joan Horvath and Rich Cameron, the team behind Mastering 3D Printing, explain step-by-step how to use the MatterControl program, which allows you to control many common types of 3D printers (including both cartesian and delta style machines). 3D Printing With MatterControl can stand alone, or it can be a companion to Mastering 3D Printing to show you how to install, configure, and use best practices with your printer and printing software. The book includes both step by step software walkthroughs and case studies with typical 3D printed objects. Whether you are a maker or a teacher of makers, 3D Printing with MatterControl will show you how to get the most out of your printer with the new standard for open source 3D printing software. While there are books available on 3D printers, and even a few on software to make models for printers, there are few good sources covering the software that actually controls these printers. MatterControl is emerging as the leading open source software for 3D printers, and 3D Printing With MatterControl covers this new standard in this brief book.

**3D Printing of Pharmaceuticals** Abdul W. Basit, Simon Gaisford, 2018-08-06 3D printing is forecast to revolutionise the

pharmaceutical sector, changing the face of medicine development, manufacture and use. Potential applications range from pre-clinical drug development and dosage form design through to the fabrication of functionalised implants and regenerative medicine. Within clinical pharmacy practice, printing technologies may finally lead to the concept of personalised medicines becoming a reality. This volume aims to be the definitive resource for anyone thinking of developing or using 3D printing technologies in the pharmaceutical sector, with a strong focus on the translation of printing technologies to a clinical setting. This text brings together leading experts to provide extensive information on an array of 3D printing techniques, reviewing the current printing technologies in the pharmaceutical manufacturing supply chain, in particular, highlighting the state-of-the-art applications in medicine and discussing modern drug product manufacture from a regulatory perspective. This book is a highly valuable resource for a range of demographics, including academic researchers and the pharmaceutical industry, providing a comprehensive inventory detailing the current and future applications of 3D printing in pharmaceuticals. Abdul W. Basit is Professor of Pharmaceutics at the UCL School of Pharmacy, University College London. Abdul's research sits at the interface between pharmaceutical science and gastroenterology, forging links between basic science and clinical outcomes. He leads a large and multidisciplinary research group, and the goal of his work is to further the understanding of gastrointestinal physiology by fundamental research. So far, this knowledge has been translated into the design of new technologies and improved disease treatments, many of which are currently in late-stage clinical trials. He has published over 350 papers, book chapters and abstracts and delivered more than 250 invited research presentations. Abdul is also a serial entrepreneur and has filed 25 patents and founded 3 pharmaceutical companies (Kuecept, Intract Pharma, FabRx). Abdul is a frequent speaker at international conferences, serves as a consultant to many pharmaceutical companies and is on the advisory boards of scientific journals, healthcare organisations and charitable bodies. He is the European Editor of the International Journal of Pharmaceutics. Abdul was the recipient of the Young Investigator Award in Pharmaceutics and Pharmaceutical Technology from the American Association of Pharmaceutical Scientists (AAPS) and is the only non-North American scientist to receive this award. He was also the recipient of the Academy of Pharmaceutical Sciences (APS) award. Simon Gaisford holds a Chair in Pharmaceutics and is Head of the Department of Pharmaceutics at the UCL School of Pharmacy, University College London. He has published 110 papers, 8 book chapters and 4 authored books. His research is focused on novel technologies for manufacturing medicines, particularly using ink-jet printing and 3D printing, and he is an expert in the physico-chemical characterisation of compounds and formulations with thermal methods and calorimetry.

Grant, 2017-09-27 This book describes the fundamentals of three-dimensional (3D) printing, addresses the practical aspects of establishing a 3D printing service in a medical facility, and explains the enormous potential value of rendering images as 3D printed models capable of providing tactile feedback and tangible information on both anatomic and pathologic states. Individual chapters also focus on selected areas of applications for 3D printing, including musculoskeletal, craniomaxillofacial, cardiovascular, and neurosurgery applications. Challenges and opportunities related to training, materials and equipment, and guidelines are addressed, and the overall costs of a 3D printing lab and the balancing of these costs against clinical benefits are discussed. Radiologists, surgeons, and other physicians will find this book to be a rich source of information on the practicalities and expanding medical applications of 3D printing.

**Sweet Revenge** Diane Mott Davidson, 2007-08-21 Goldy Schulz is thrilled to be catering a holiday breakfast feast for the staff of the Aspen Meadow Library. But little does she know that on the menu, alongside the Great Expectations Grapefruit, Chuzzlewit Cheese Pie, and Bleak House Bars, is a large helping of murder. While setting up at the library, Goldy spots a woman lurking in the stacks who bears a striking resemblance to Sandee Brisbane—the Sandee Brisbane who killed Goldy's ex-husband, the Jerk. But Sandee is supposed to be dead. Or so everyone believes. Goldy's suspicions mount when the body

of Drew Wellington, a former district attorney, is found in a corner of the library with a map worth thousands of dollars stashed in his clothing. She's convinced that Sandee is involved. But the holiday madness is only just beginning for Goldy. Soon she's drawn into the dangerous, double-crossing world of high-end map dealing. And like the ghost of Christmas past, Sandee keeps making an appearance. Could she be out to prove that revenge is sweet?
