The Image of the City Kevin Lynch, 1964-06-15 The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

Founders of American Industrial Design Carroll Gantz, 2014-07-17 As the Great Depression started in 1929, several dozen creative individuals from a variety of artistic fields, including theatre, advertising, graphics, fashion and furniture design, pioneered a new profession. Responding to unprecedented public and industry demand for new styles, these artists entered the industrial world during what was called the Machine Age, to introduce modern design to the external appearance and form of mass-produced, functional, mechanical consumer products formerly not considered art. The popular designs by these machine designers increased sales and profits dramatically for manufacturers, which helped the economy to recover;

established a new profession, industrial design; and within a decade, changed American products from mechanical monstrosities into sleek, modern forms expressive of the future. This book is about those industrial designers and how they founded, developed, educated and organized today's profession of more than 50,000 practitioners.

Multidisciplinary Aspects of Design Francesca Zanella,Giampiero Bosoni,Elisabetta Di Stefano,Gioia Laura Iannilli,Giovanni Matteucci,Rita Messori,Raffaella Trocchianesi,2023-12-30 This open access book gathers the contributions from the Design! OPEN International Conference, held in Parma, Italy in May 2022. The conference explored the multidisciplinary aspects of design starting from its dimensions: objects (design as focused on the object, on its functional and symbolic dimension, and at the same time on the object as a tool for representing cultures), processes (the designer's self-reflective moment which is focused on the analysis and on the definition of processes in various contexts, spanning innovation, social engagement, reflection on emergencies or forecasting), experiences (design as a theoretical and practical strategy aimed at facilitating experiential interactions among people, people and objects or environments), and narratives (making history, representing through different media, archiving, narrating, and exhibiting design). The contributions, which were selected by means of a rigorous international peer-review process, highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaboration among different specialists.

Zionists in Interwar Czechoslovakia Tatjana Lichtenstein, 2016-04-18 This book presents an unconventional history of minority nationalism in interwar Eastern Europe. Focusing on an influential group of grassroots activists, Tatjana Lichtenstein uncovers Zionist projects intended to sustain the flourishing Jewish national life in Czechoslovakia. The book shows that Zionism was not an exit strategy for Jews, but as a ticket of admission to the societies they already called home. It explores how and why Zionists envisioned minority nationalism as a way to construct Jews' belonging and civic equality in Czechoslovakia. By giving voice to the diversity of aspirations within interwar Zionism, the book offers a fresh view of minority nationalism and state building in Eastern Europe.

The 3rd International Conference on Internet, Education and Information Technology (IEIT 2023) was held on April 28-30, 2023 at the Xiamen, China. With the development of science and technology, information technology and information resources should be actively developed and

From the technical point of view, the basic characteristics of educational informatization are digitalization, networking, intelligentization and multi-media. What People Leave Behind Francesca Comunello, Fabrizio Martire, Lorenzo Sabetta, 2022-10-11 This open access book focuses on a particular but significant topic in the social sciences: the concepts of “footprint” and “trace”. It associates these concepts with hotly debated topics such as surveillance capitalism and knowledge society. The editors and authors discuss the concept footprints and traces as unintended by-products of other (differently focused and oriented) actions that remain empirically imprinted in virtual and real spaces. The volume therefore opens new scenarios for social theory and applied social research in asking what the stakes, risks and potential of this approach are. It systematically raises and addresses these questions within a consistent framework, bringing together a heterogeneous group of international social scientists. Given the multifaceted objectives involved in exploring footprints and traces, the volume discusses heuristic aspects and ethical dimensions, scientific analyses and political considerations, empirical perspectives and theoretical foundations. At the same time, it brings together perspectives from cultural analysis and social theory, communication and Internet studies, big-data informed research and computational social science. This innovative volume is of interest to a broad interdisciplinary readership: sociologists, communication researchers, Internet scholars, anthropologists, cognitive and behavioral scientists, historians, and epistemologists, among others.

Why Is The China Model Losing Its Power? - Challenges And Opportunities Of The Second Global Competition Jinghao Zhou,2020-07-23 History has proved that communism failed at many levels during the first global competition between the capitalist and socialist camps during the Cold War. As a result, the socialist camp was dissolved. China is one of the few communist countries to survive in the twenty-first century. The Chinese economy was on the verge of collapse in the 1970s but began to take off in the early 1980s, guided by the China model. China became the world's second largest economy in 2010 and has quickly expanded its enormous global market and political influence. The second global competition between the capitalist countries and China has started. The second global competition is in fact between the China model and the Washington Consensus. Will Western hegemonies end as the result of the second global competition? Will China be able to rewrite the international rules? Will the Chinese communist political system collapse during the competition? What should the West do to the China model? This book will explore the implications of the China model in the context of the second global competition and argues that the downturn of the China model and China's global expansion are the two sides of the same coin. The China model is losing its power but not broken. China would be able to become even stronger, if it could reshape the philosophical foundation of the China model. The future of Western hegemony will depend on how the West understands the China model and deals with it. This book addresses these aspects and more.

Antitrust and Upstream Platform Power Plays A. K. von Moltke,2023-12-14 In recent years, large digital platforms have been in the doghouse of antitrust decision-makers worldwide. Antitrust regulators agree, urgent intervention is needed. Interestingly, it is the plight of victimized suppliers—of merchants, app developers, publishers, platform labourers, and the like, who are upstream in the value chain—that has topped the policy agenda, prompting scrutiny of an almost unprecedented intensity. Amid such anxieties, *Antitrust and Upstream Platform Power Plays* asks a somewhat provocative question: are upstream platform power plays really 'competition problems', and ones for antitrust, at that? The obvious answer—'yes'—is deceptively simple for a number of reasons. First, it contradicts contemporary antitrust's single-minded focus on consumers, which has all but erased supplier exploitation in the brick-and-mortar economy from the policy's radar. Second, the wider antitrust community remains bitterly divided when it comes to judging platform practices. In addition, if any consensus could be had, it would almost certainly confirm the long-standing tenet that antitrust cannot be about supplier welfare, as such. These paradoxes call for a policy introspection—precisely what this book provides. The analysis offered in *Antitrust and Upstream Platform Power Plays* is altogether normative, theoretical, and practical. Normative because it

engages in a supplier-mindful soul-searching exercise, which advances our understanding of antitrust's foundations; theoretical as it sheds multidisciplinary insights on upstream effects in the platform economy and develops new frameworks for rationalizing them; and practical since it takes a deep dive into the complex antitrust machinery while staying attuned to other available levers of public action. Answering a compelling question with an equally compelling answer, this work will appeal to scholars and policymakers worldwide with a particular interest in platform regulation, antitrust, and powerful digital platforms.
