Understanding by Design Grant P. Wiggins, Jay McTighe, 2005 What is understanding and how does it differ from knowledge? How can we determine the big ideas worth understanding? Why is understanding an important teaching goal, and how do we know when students have attained it? How can we create a rigorous and engaging curriculum that focuses on understanding and leads to improved student performance in today's high-stakes, standards-based environment? Authors Grant Wiggins and Jay McTighe answer these and many other questions in this second edition of *Understanding by Design*. Drawing on feedback from thousands of educators around the world who have used the UbD framework since its introduction in 1998, the authors have greatly revised and expanded their original work to guide educators across the K-16 spectrum in the design of curriculum, assessment, and instruction. With an improved UbD Template at its core, the book explains the rationale of backward design and explores in greater depth the meaning of such key ideas as essential questions and transfer tasks. Readers will learn why the familiar coverage- and activity-based approaches to curriculum design fall short, and how a focus on the six facets of understanding can enrich student learning. With an expanded array of practical strategies, tools, and examples from all subject areas, the book demonstrates how the research-based principles of *Understanding by Design* apply to district frameworks as well as to individual units of curriculum. Combining provocative ideas, thoughtful analysis, and tested approaches, this new edition of *Understanding by Design* offers teacher-designers a clear path to the creation of curriculum that ensures better learning and a more stimulating experience for students and teachers alike.

Fringe to Famous Tony Moore,Mark Gibson,Chris McAuliffe,Maura Edmond,2024-01-25 *Fringe to Famous* examines exchange between small scenes of cultural production and mainstream institutions and markets. Drawing on Australian examples in music, streetwear, comedy, screen and digital games, it argues that there has been much greater crossover between the two than is generally recognized. The book resists a tendency to represent fringe and mainstream as abstract opposites, bringing a focus instead to concrete historical formations. It offers an alternative both to romantic celebrations of a 'pure' fringe - discredited now by half a century of critical responses to the counterculture - and to an increasingly hardened anti-romantic reaction. Drawing on extensive original interviews, *Fringe to Famous* offers an overview of transformations in Australian culture since the 1980s, concluding with suggestions for cultural policy 'after the creative industries'. It proposes an idea of 'generative hybridity' between fringe and mainstream that allows us to imagine new possibilities for arts and culture in the 2020s and beyond.

The Image of the City Kevin Lynch,1964-06-15 The classic work on the evaluation of city form. What does the city's form

actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

Multidisciplinary Aspects of Design Francesca Zanella,Giampiero Bosoni,Elisabetta Di Stefano,Gioia Laura Iannilli,Giovanni Matteucci,Rita Messori,Raffaella Trocchianesi,2023-12-30 This open access book gathers the contributions from the Design! OPEN International Conference, held in Parma, Italy in May 2022. The conference explored the multidisciplinary aspects of design starting from its dimensions: objects (design as focused on the object, on its functional and symbolic dimension, and at the same time on the object as a tool for representing cultures), processes (the designer's self-reflective moment which is focused on the analysis and on the definition of processes in various contexts, spanning innovation, social engagement, reflection on emergencies or forecasting), experiences (design as a theoretical and practical strategy aimed at facilitating experiential interactions among people, people and objects or environments), and narratives (making history, representing through different media, archiving, narrating, and exhibiting design). The contributions, which were selected by means of a rigorous international peer-review process, highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaboration among different specialists.
