Reinventing the Wheel Bronwen Percival, Francis Percival, 2017-11-30 \*\*Wine and Spirits Book of the Year 2017\*\* A fascinating look into the world of cheese and its creators. In little more than a century, the drive towards industrial and intensive farming has altered every aspect of the cheesemaking process, from the bodies of the animals that provide the milk to the science behind the microbial strains that ferment it. Reinventing the Wheel explores what has been lost as expressive, artisanal cheeses that convey a sense of place have given way to the juggernaut of homogeneous factory production. While Bronwen and Francis Percival lament the decline of farmhouse cheese and reject the consequences of industrialisation, this book's message is one of optimism. Scientists have only recently begun to reveal the significance of the healthy microbial communities that contribute to the flavour and safety of cheese, while local producers are returning to the cheese-making methods of their parents and grandparents. This smart, engaging book sheds light on the surprising truths and science behind the dairy industry. Discover how, one experiment at a time, these dynamic communities of researchers and cheesemakers are reinventing the wheel.

Cheddar Gordon Edgar, 2015 Cheddar is the world's most ubiquitous and beloved cheese. More than that, cheddar holds a key to understanding our food politics and even our cultural identity. In 'Cheddar', Gordon Edgar (Cheesemonger) traces the unexplored history of cheddar, with both wry humor and an eye toward its future. Cheddar has something to tell us about this country: from the way people rally to certain types of cheddar but not others, to the gradual transformation of a once artisan cheese into big commodity blocks (and back again) and the effect that has had on rural communities. One of the first cheeses to be industrialized, cheddar's progression from farmstead wheels to machine-extruded singles mirrors that of our entire food system. The resurgence of traditional cheesemaking over the last few decades, in turn, speaks to ways that we're redefining how food is produced. Edgar also answers some key questions about cheddar. Is it the most popular cheese in the land? Did England invent it and America cheapen it? Is today's 40-pound block a precursor to Velveeta? You'll find these answers and more in 'Cheddar', a book as thought-provoking as it is entertaining and that reveals what a familiar food has to tell us about ourselves and our culture--Page 4 of cover.

**The Art of Natural Cheesemaking** David Asher, 2015-06-30 Including more than 35 step-by-step recipes from the Black Sheep School of Cheesemaking Most DIY cheesemaking books are hard to follow, complicated, and confusing, and call for the

use of packaged freeze-dried cultures, chemical additives, and expensive cheesemaking equipment. For though bread baking has its sourdough, brewing its lambic ales, and pickling its wild fermentation, standard Western cheesemaking practice today is decidedly unnatural. In *The Art of Natural Cheesemaking*, David Asher practices and preaches a traditional, but increasingly countercultural, way of making cheese—one that is natural and intuitive, grounded in ecological principles and biological science. This book encourages home and small-scale commercial cheesemakers to take a different approach by showing them: • How to source good milk, including raw milk; • How to keep their own bacterial starter cultures and fungal ripening cultures; • How make their own rennet—and how to make good cheese without it; • How to avoid the use of plastic equipment and chemical additives; and • How to use appropriate technologies. Introductory chapters explore and explain the basic elements of cheese: milk, cultures, rennet, salt, tools, and the cheese cave. The fourteen chapters that follow each examine a particular class of cheese, from kefir and paneer to washed-rind and alpine styles, offering specific recipes and handling advice. The techniques presented are direct and thorough, fully illustrated with hand-drawn diagrams and triptych photos that show the transformation of cheeses in a comparative and dynamic fashion. *The Art of Natural Cheesemaking* is the first cheesemaking book to take a political stance against Big Dairy and to criticize both standard industrial and artisanal cheesemaking practices. It promotes the use of ethical animal rennet and protests the use of laboratory-grown freeze-dried cultures. It also explores how GMO technology is creeping into our cheese and the steps we can take to stop it. This book sounds a clarion call to cheesemakers to adopt more natural, sustainable practices. It may well change the way we look at cheese, and how we make it ourselves.

**The Dirty Chef** Matthew Evans, 2013-10-01 The funny, heart-warming and at times exhausting behind-the-scenes story of Matthew Evans' transformation from high-profile food critic to television's *Gourmet Farmer*. How do you go from being an urban dog to a country boy without any experience of the bush? In 2008 Matthew Evans, one of Australia's most powerful food critics, stepped off the Sydney treadmill to farm 20 acres in Australia's southernmost shire. What is it really like to take the plunge, leaving a whole world of familiar people, places and work behind? How does it feel to use a cordless drill for the first time, to plant a vegetable garden, to milk a cow, to slaughter a chook for dinner? And what if a TV show is filming the whole process? This is the story of that transformation. The story of a life more in tune with the seasons and more connected to the soil. A life that is as rewarding as it is exhausting. The story of a family trying to turn a living from the noble and ancient art of growing things on the land.

*Atticus Claw Lends a Paw* Jennifer Gray, 2013-08-13 Atticus Grammatticus Cattypuss Claw, the world's greatest POLICE cat, is back. When the kittens at the local cats' home are wrongly suspected of a knitting crime spree, Inspector Cheddar is

Can Atticus reach the lost city of cats and save the priceless treasure from the villains before it's too late?

*Hunt for the Blower Bentley* Kevin Gosselin,2011-09-28 THE CAR - Bentley serial number SM 3912 was a Phillips bodied two-seat DHC on a supercharged 4.5 litre chassis. The facts are clear. It was bought new by Lord Brougham & Vaux. And it was last heard of in 1939. THE DISAPPEARANCE -Stephan Sidlow, senior member of the Air Raid Prevention Corps, sworn to protect England, acquires Blower SM 3912 just as Britain comes under attack from Germany. He undoubtedly uses the Blower for good to cross the island nation at break neck speed and shore up her defenses. But as the war progresses, Stephan and the Blower might actually be some of England's most dangerous adversaries. THE HUNT - When new information regarding SM 3912 comes to light, automotive archaeologist Faston Hanks is cajoled off vacation and onto the case of finding the missing Blower Bentley. The Blower proves elusive and the hunt goes on for years. Until millions of dollars are on the line and Faston needs to find SM 3912 to foil one of the boldest crimes ever attempted in the rarified world of high-end car collectors. Bringing to life the final moments of the Blower in 1944 and the present day attempt to find it, Hunt for the Blower Bentley richly imagines the fate of the only one of the fifty Blower Bentleys built that is unaccounted for. There is no other character in fiction like Faston Hanks. If you love cars and history, you'll find Faston an engaging person to spend time with. And you will definitely find yourself wishing to be at his side as he tracks down the world's most desirable cars.

They also pair well with bourbon and elevate a burger, not to mention a wedge salad. Along the way we learn about pasture-raised animals, spend time with fearless cheesemakers, discover tips on creating next-level boards for every style of cheese. And find a bucket-list of 25 greats readers will want to tick off, one by one. For any curd nerd whose eyes light up at the mere mention of triple crème, it's a journey that can't be missed.

**How Many People Are There In My Head? And In Hers?** Jonathan C.W. Edwards,2013-07-23 Makes the proposal that the only possible solution to the 'mind-brain' problem is that each nerve cell is conscious separately and that we have no other 'global' consciousness.
